A Grand New Dwarf Fern

"TEDDY JUNIOR"

"Teddy Junior," the Fern for Every Household. It is a sport from the now famous Roosevelt Fern, and while its habit of growth is to produce a shorter frond it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect, and thin, scraggy foliage is never seen in this variety. "Teddy" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a 4-inch pot, while twelve to fifteen is the average number other varieties will produce in the same size pot. It is such a compact, vigorous grower that it will thrive under most adverse conditions, making an exceptionally rapid growth and producing a plant of rare beauty and perfection in the average dwelling house without special care or attention. Owing to its habit of producing the great quantity of massive foliage in small pots, this Fern makes the finest pedestal plant ever produced, and will prove indispensable for decorating dining room or library tables and numerous other places in the home where limited space will not permit using large pots or varieties with longer fronds. As a table decoration, fern growers can appreciate the commercial value of a dwarf variety that will produce forty to fifty fronds twelve to fifteen inches long in a 4-inch pot. Such plants could readily be disposed of and every grower can produce them from "Teddy Junior" with as little care and expense as they can grow other varieties. Ready for June 1st delivery. THE NEW, CLEAR SCARLET BEDDING GERANIUM

The Best Commercial Novelty for 1914

"HELEN MICHELL"

(Name registered with S. A. F. & O. H.)

Seedling Cross Jean Viaud and Alphonse Ricard.

This sterling novelty will be introduced jointly by Henry F. Michell Co., Philadelphia, Pa., and ourselves,

and the plants will all be grown by us at our Norwood place where we will be pleased to have you call.

You will find this Geranium has all the good points claimed for it.

"Helen Michell" is semi-double, of the clearest possible shade of scarlet, is early in bloom and produces these continually during the season. It grows compact medium dwarf, with lustrous green foliage and throws up gigantic flower heads continuously; we claim it to have the largest flower heads of any of the bedding Geraniums. The individual blooms measure $2\frac{1}{2}$ inches across. It is a common occurrence that a single 4-inch pot plant shows 4 fully-open gigantic flower heads, several half open, and more in bud.

We are booking orders that will be filled in rotation from January, 1914.

$2\frac{1}{4}$ -inch pots\$2.50 per doz.
\$15 per 100, \$125 per 1,000
